## Skills

- **Programming Languages:** Go, JavaScript, Python, Java
- **Databases:** PostgreSQL, DynamoDB
- **Frontend:** React, Redux, Vue, HTML5/CSS3/SASS/LESS
- **Backend:** Server-side Go, Spring, NodeJS, API design
- **Cloud:** AWS (CDK, Lambda, SNS, SQS, S3)
- **Other:** JIRA, Git, TDD, Agile

## Employment

### Northwestern Mutual - Associate Software Engineer

*Remote, Jan 2021 - Present*

- Develop internal and customer-facing features across microservices using Go, AWS (SQS, SNS, Lambda, S3, DynamoDB), and Vue
- Provisioned AWS cloud infrastructure using CDK (Python)
- Built internal tool using React and Go to help our marketing team perform admin tasks on customer-facing applications
- **Technology Stack:** Go, AWS, JavaScript, Python

### Lambda School - Team Lead

*Remote, Apr 2020 - Dec 2020*

- Mentored students on how to learn effectively and solve programming problems while learning Computer Science
- Met for 1-on-1s daily to discuss progress, review student's code, and provide feedback on areas of improvement
- Led daily standup meetings to facilitate the sharing of ideas and work progress, and provide guidance for that week's study material
- Led after hours Q&A sessions to help with the study material and debug code
- **Technology Stack:** Python

### CrcI - Software Engineer Intern / Jr Software Engineer

*Remote, Oct 2018 - May 2019 (startup ran out of funding)*

- Worked alongside design and the remote backend team to develop the customer-facing pages using React and Sass
- Collaborated with QA to target multiple mobile devices and browsers
- Wrote integration and unit tests in Python
- Implemented UI components using a Model View Controller architecture using Swift and Xcode
- **Technology Stack:** JavaScript (React), Python, Swift

## Projects

### Task Manager Frontend and Backend Microservices [GitHub](#)

*Task manager app that lets you add tasks, set due dates, get reminders, and customize themes.*

**Technology Stack:** React, Redux, Saas, Spring (Java), PostgreSQL

- Implemented user authentication, CRUD operations, and styling of the app

### Speak Out [GitHub](#)

*School Management Software for English school in Bahrain*

**Technology Stack:** React, Redux, Saas, Node, PostgreSQL

- Led Front-end development on a greenfield project.
- Planned, tested, implemented, and debugged React/Redux application with routing, form handling, and styling
- Fully implemented user authentication on both Front-end and Back-end using Passport JS
- Migrated SQL client data to AWS PostgreSQL
- Collaborated with a team of 6 developers, 1 UX/UI designer, 1 Product Manager, following agile methodology

### Treasure Hunt [GitHub](#)

*The final project of Computer Science fundamentals covering Data Structures traversal and Algorithms*

**Technology Stack:** JavaScript

- Independently completed the task of efficiently traversing an island maze, solving puzzles, and mining a coin

## Education

**Lambda School** - Full Stack Development and Computer Science - Jun 2019 - Feb 2020

**Independent Studies** - Web and Mobile Development - Jan 2017 - Jan 2018

**San Francisco State University** - Completed 50 credits toward BA in English, 2015 - 2018

**City College of San Francisco** - A.A. - 2014
